ECOLOGY AND ENVIRONMENT, INC.  
FIELD INVESTIGATION TEAM  
SITE SAFETY PLAN

## A. GENERAL INFORMATION

SITE: Municipal Landfill, Belmont Heights

F05-8705-001

TOD NO.: FAS-8705-017LOCATION: Rt. 68 & Kenicott St.WSTS/ACCOUNT NO: FIL 6533 GA 34PLAN PREPARED BY: GERARD BREENDATE: 9-18-87APPROVED BY: Dale M. StampDATE: 9/28/87

OBJECTIVE(S): (including description of work to be performed):

Site inspection including interviews with site representatives, visual inspection, and soil samples, location of which to be determined at site.  
(No soil samples are to be taken.)

PROPOSED DATE OF INVESTIGATION: 10-1-87BACKGROUND REVIEW: Complete:  Preliminary: DOCUMENTATION/SUMMARY: Overall Hazard: Serious:  Moderate:   
Low:  Unknown: 

## B. SITE/WASTE CHARACTERISTICS

WASTE TYPE(S): Liquid  Solid  Sludge  Gas CHARACTERISTIC(S): Corrosive  Ignitable  Radioactive  Volatile Toxic  Reactive  Unknown  Other (Name) EXPERIMENTAL CARCINOGENFACILITY DESCRIPTION: 58 acre landfill, 18'0" by 1300'  
located in commercial area, residential area  
within 1/2 mile.Principal Disposal Method (type and location): Landfill w/ty area fill

Unusual Features (dike integrity, power lines, terrain, etc.):

village well and water tank on property, well only  
for back-up purposes. On-site lake on west boundary, not  
completely fenced.Status: (Active, inactive, unknown) / 1969-present. Site is in the  
process of closure, applying final cover. The park district  
would like to utilize the site once final cover is applied.

**History:** (Worker or non-worker injury; complaints from public; previous agency action): Complaint from public; A.T. Berk to TERAMERE

Home Owners Assoc. about apparent leachate seep on north slope of landfill. Inspections by TEPRA numerous times to insure proper closure, investigate complaint. On Dec. 16, 1975 the TEPRA investigated and found about 100 55-gal barrels (most of which appeared empty) in the southwest area of the site near the large water storage tank. Black earth and discolored water were observed near the barrels. Barrels held water-soluble cutting oils.

C. HAZARD EVALUATION

(Use Hazard Evaluation of Chemicals sheets for specific or representative chemicals present.):

general municipal refuse  
industrial wastes

found in leachate sample	1,1,2-cis-dichloroethylene	1700 ug/L
	1,1,1-trichloroethane	700 ug/L
	carbon tetrachloride	600 ug/L
	1,1,1-trichloroethane	600 ug/L
	trichloroethylene	124 ug/L
	toluene, benzene, lead	toluene - 270 ug/L benzene 22.2 ug/L lead 0.38 mg/L

D. SITE SAFETY WORK PLAN

PERIMETER ESTABLISHMENT: Map/Sketch Attached yes Site Secured? No  
Perimeter Identified? No Zone(s) of Contamination Identified? ✓ No

ASSUME ENTIRE SITE IS CONTAMINATED

PERSONAL PROTECTION

Level of Protection: A    B    C    D ✓

Modifications: LEVEL D with possible upgrade to LEVEL C if monitoring equipment levels for upgrade are met.

SURVEILLANCE EQUIPMENT AND MATERIALS:

Action levels: O<sub>2</sub> meter < 19.5% or > 25% O<sub>2</sub> = abandon site + contact RSC

Explosimeter: > 30% LEL = abandon site, contact RSC

Radi Msr: > 0.1 mR/hr. or alarm sounds; Abandon site + contact RSC

Dragee tubes or monitor for HCN - Any reading abandon site + contact RSC

OVA 0-1 ppm above background = Level D

>1-5 ppm " " = Level C

>5-500 ppm " " = Level B } abandon site, contact RS

>500 ppm " 2 of " = Level A } 2A

>5  
abandon site

**DECONTAMINATION PROCEDURES:**

All contaminated equipment will be washed with Alconnex and rinsed with distilled water. Will leave wastewater at site with prior permission.

**Special Equipment, Facilities, or Procedures:** none**SITE ENTRY PROCEDURES:**

Obtained permission from owner/operator.  
Always use buddy system. Stay aware of contaminated AREA. Locate all exits prior to site entry, if site is secured.  
Obey facility safety regulations as a minimum.

Team Member

## WASTE-DISPOSAL METHODS

The disposal methods outlined below are intended only as guidelines. We do not assume responsibility for their use. Careful consideration must be given to the chemical and physical properties of the substance. In addition, laws and regulations may preclude the use of these methods which are primarily designed for small quantities.

3. Observe all federal, state, and local laws.

The disposal of some chemicals may require deactivation or modification of the material by chemical means. Chemical waste-disposal reactions must be handled with same care and consideration used with synthetic procedures. Appropriate consideration must be given to reaction conditions, i.e., stoichiometry, order and rate of reaction, heat of reaction, evolution of gaseous products, efficiency of stirring, rate of reaction, atmospheric sensitivity, etc.

Chemical waste-disposal reactions should be carried out in a chemical fume hood and in appropriate laboratory glassware. Because these reactions are often vigorous, protective safety equipment such as safety glasses, respirator, gloves, face and/or safety shield and other protective equipment must be used.

Initial reactions in a disposal sequence should be carried out on a small scale (5-10g). The reactant concentrations should not exceed 10% of the reaction volume and final reaction volume should not exceed 50% of the working capacity of the reaction vessel, regardless of the reaction scale. Larger quantities of the material should be handled in several small-size reactions. To ensure completion of reaction, the waste disposal procedure should be run for at least an additional 4 to 8 hours after materials have been mixed.

All reactions should be run by technically qualified persons familiar with the potential hazards of the chemical reactions.

Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

The material should be ignited in the presence of sodium carbonate and slaked lime (calcium hydroxide). The substance should be mixed with vermiculite and then with the dry caustics, wrapped in paper and burned in a chemical incinerator equipped with an afterburner and scrubber.

This combustible material may be burned in a chemical incinerator equipped with an afterburner and scrubber.

Burn in a chemical incinerator equipped with an afterburner and scrubber but exert extra care in igniting as this material is highly flammable.

To a solution of the product in water, add an excess of dilute sulfuric acid. Let stand overnight. Remove any insolubles and bury in a landfill site approved for hazardous-waste disposal.

Cautiously dissolve the material in water. Neutralize immediately with sodium carbonate or, if the material does not dissolve completely, add a little hydrochloric acid followed by sodium carbonate. Add calcium chloride in excess of the amount needed to precipitate the fluoride and/or carbonate.

Separate the insolubles and bury in a landfill site approved for hazardous-waste disposal.

- G Under an inert atmosphere, cautiously add the material to dry butanol in an appropriate solvent. The chemical reaction may be vigorous and/or exothermic. Provisions must be made for venting of large volumes of highly flammable hydrogen and/or hydrocarbon gases. Neutralize the solution with aqueous acid. Filter off any solid residues for disposal as hazardous waste. Burn the liquid portion in a chemical incinerator equipped with an afterburner and scrubber.
- H Neutralize the solution and add filtering agent (10g per 100ml). Evaporate the liquid and bag the residual solid for burial in a landfill site approved for hazardous-waste disposal.
- I Dissolve the solid in (or dilute the solution with) a large volume of water. Carefully add a dilute solution of acetic acid or acetone to the mixture in a well ventilated area. Provisions should be made to vent safely the hydrogen gas given off during the decomposition. Check acidity of the solution and adjust to pH 1 if necessary. Let stand overnight. Neutralize the solution (pH 7). Evaporate the solution and bury the residue in a landfill site approved for hazardous-waste disposal.
- J Cautiously acidify a 3% solution or a suspension of the material to pH 2 with sulfuric acid. Gradually add a 50% excess of aqueous sodium bisulfite with stirring at room temperature. An increase in temperature indicates that a reaction is taking place. If no reaction is observed on the addition of 10% of the sodium bisulfite solution, initiate it by cautiously adding more acid. If manganese, chromium, or molybdenum is present, adjust the pH of the solution to 7 and treat with sulfide to precipitate for burial as hazardous waste. Destroy excess sulfide, neutralize and flush solution down the drain.
- K Please contact the Technical Services Department. Be sure to mention name, catalog number and quantity of the material.
- L The material should be dissolved in 1) water; 2) acid solution or 3) oxidized to a water-soluble state. Precipitate the material as the sulfide, adjusting the pH of the solution to 7 to complete precipitation. Filter the insolubles and dispose of them in a hazardous-waste site. Destroy any excess sulfide with sodium hypochlorite. Neutralize the solution before flushing down the drain.
- M A slurry of the arenediazonium salt with water can be disposed of by adding it gradually to a stirred solution of 5-10% excess 2-naphthol in 3% aqueous sodium hydroxide at 0-20°C. After 12 hours, the resulting azo dye is filtered and either incinerated or buried in a landfill site approved for hazardous-waste disposal. Neutralize the remaining solution before disposal.
- N For small quantities: cautiously add to a large stirred excess of water. Adjust the pH to neutral, separate any insoluble solids or liquids and package them for hazardous-waste disposal. Flush the aqueous solution down the drain with plenty of water. The hydrolysis and neutralization reactions may generate heat and fumes which can be controlled by the rate of addition.
- O Bury in a landfill site approved for the disposal of chemical and hazardous waste.
- P Material in the elemental state should be recovered for reuse or recycling.
- Q Cautiously make a 5% solution of the material in water or dilute acid. There may be a vigorous, exothermic reaction and fumes may be generated due to the hydrolysis of the material. Control any reaction by cooling and by the rate of addition of the material. Gradually add dilute ammonium hydroxide to pH 10. Filter off any precipitate for disposal in a chemical landfill. If there is no precipitation, gradually adjust the pH from 10 to 6, stopping when precipitation occurs.
- R Catalysts and expensive metals should be recovered for reuse or recycling.
- S Treat a dilute basic solution (pH 10-11) of the material with a 50% excess of commercial laundry bleach. Control the temperature by the addition rate of bleach and adjust pH if necessary. Let stand overnight. Cautiously adjust solution to pH 7. Vigorous evolution of gas may occur. Filter any solids for burial in a chemical landfill. Precipitate any heavy metals by addition of sulfide and isolate for burial. Additional equivalents of hypochlorite may be needed if the metal can be oxidized to a higher valence state. For metal carbonyls, the reaction should be carried out under nitrogen.
- T Cautiously make a 5% solution of the product in water; vent because of possible vigorous evolution of flammable hydrogen gas. Acidify the solution to pH 1 by adding 1M sulfuric acid dropwise. Acidification will cause vigorous evolution of hydrogen gas. Allow the solution to stand overnight. Evaporate the solution to dryness and bury the residue in a landfill site approved for hazardous-waste disposal.
- U Take the material (or a solution) and make a 5% solution in tetrahydrofuran. Cautiously add the solution dropwise to an ice-cooled, stirred basic solution of commercial bleach. Oxidation may release flammable hydrocarbon gases which must be vented. Let stand overnight. Adjust the pH to 7 and destroy excess hypochlorite with sodium bisulfite before disposal of the solution.
- V Under an inert atmosphere cautiously add dry butanol or a mixture of dry butanol in an appropriate solvent, to a solution of the material in tetrahydrofuran. The chemical reaction may be vigorous and/or exothermic. Provisions must be made for the venting of a large volume of flammable hydrogen gas. When gas evolution ceases, cautiously add a basic hypochlorite solution dropwise to the reaction solution. Let stand overnight. Neutralize the solution and treat with sodium bisulfite to destroy any excess hypochlorite. Filter any solids for burial in a landfill site approved for hazardous-waste disposal.

THE SIGMA-ALDRICH LIBRARY OF CHEMICAL SAFETY DATA  
Explanation of Codes

PROCEDURES FOR SPILLS OR LEAKS

- 1 Absorb on sand or vermiculite and place in closed container for disposal.
- 2 Cover with dry lime, sand, or soda ash. Place in covered containers using nonsparking tools and transport outdoors.
- 3 Shut off all sources of ignition.
- 4 Evacuate area.
- 5 Cover with an activated carbon adsorbent, take up and place in closed container. Transport outdoors.
- 6 Ventilate area and wash spill site after material pickup is complete.
- 7 Sweep up, place in a bag and hold for waste disposal.
- 8 Avoid raising dust.
- 9 Wear self-contained breathing apparatus, rubber boots and heavy rubber gloves.
- 10 Wear respirator, chemical safety goggles, rubber boots and heavy rubber gloves.
- 11 Cover with dry lime or soda ash, pick up, keep in a closed container and hold for waste disposal.
- 12 Carefully sweep up and remove.
- 13 Flush spill area with copious amounts of water.
- 14 Mix with solid sodium bicarbonate.
- 15 Place in appropriate container.
- 16 Wear protective equipment.
- 17 Wash spill site with soap solution.
- 18 Please contact the Technical Services Department. Be sure to mention the name and catalog number of the material.

FIRE-EXTINGUISHING MEDIA

- 1 Carbon dioxide.
- 2 Dry chemical powder.
- 3 Water spray.
- 4 Alcohol or polymer foam.
- 5 Class D fire-extinguishing material only.
- 6 Water may be effective for cooling, but may not effect extinguishment.
- 7 Carbon dioxide, dry chemical powder, alcohol or polymer foam.
- 8 Foam and water spray are effective but may cause frothing.
- 9 Do not use dry chemical powder extinguisher on this material.
- 10 Do not use carbon dioxide extinguisher on this material.
- 11 Noncombustible.
- 12 Do not use water.
- 13 Use extinguishing media appropriate to surrounding fire conditions.

## 1,2-DICHLOROETHYLENE

DEL

Common Synonyms Acetylene dichloride sym-dichloroethylene Dichloroethane cis-1, 2-dichloroethylene trans-1, 2-dichloroethylene	Liquid  Sinks in water. Flammable, irritating vapor is produced.
	Weir goggles and self-contained breathing apparatus. Shut off ignition sources. Call fire department. Stop discharge if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.
Fire	FLAMMABLE. POSSIBLE GASES MAY BE PRODUCED IN FIRE. Container may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID.  VAPOR If inhaled will cause dizziness, nausea, vomiting, or difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Harmful if swallowed. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.  Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook) Issue warning-high flammability Restrict access Evacuate area Should be removed Chemical and physical treatment	2. LABEL 2.1 Category: Flammable liquid 2.2 Class: 3
3. CHEMICAL DESIGNATIONS 3.1 CC Compatibility Class: Not listed 3.2 Formula: C <sub>2</sub> H <sub>4</sub> Cl <sub>2</sub> = CHCl = CHCl 3.3 IMO/UN Designation: 3.2/1150 3.4 DOT ID No.: 1150 3.5 CAS Registry No.: 540-59-0	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ethereal, slightly acrid; pleasant, chloroform-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves; safety goggles; air supply mask or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation causes nausea, vomiting, weakness, tremor, epigastric cramps, central nervous depression. Contact with liquid causes irritation of eyes and (on prolonged contact) skin. Ingestion causes slight depression to deep narcosis. 5.3 Treatment of Exposure: INHALATION: remove from further exposure; if breathing is difficult, give oxygen; if victim is not breathing, give artificial respiration, preferably mouth-to-mouth; give oxygen when breathing is resumed; call a physician. EYES: flush with water for at least 15 min. SKIN: wash well with soap and water. INGESTION: give gastric lavage and cathartics. 5.4 Threshold Limit Value: 200 ppm 5.5 Short Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Grade 2; oral LD <sub>50</sub> = 770 mg/kg (rat) 5.7 Late Toxicity: Produces liver and kidney injury in experimental animals 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available 5.11IDLH Value: 4,000 ppm	6. CHRIS, Vol. III

## CARBON TETRACHLORIDE

CBT

Common Synonyms Carbon Tel Tetrachloromethane Benzochloride Mecetone Perchloromethane	Watery liquid Colorless Sweet odor  Sinks in water. Poisonous vapor is produced.
	Avoid contact with liquid and vapor. Keep people away. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies.
Fire	Not flammable. POISONOUS AND IRRITATING GASES ARE PRODUCED WHEN HEATED. Wear goggles and self-contained breathing apparatus.
Exposure	CALL FOR MEDICAL AID  VAPOR POISONOUS IF INHALED. Inhalation to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Inhalation to skin and eyes. Remove contaminated clothing and shoes. Pour affected areas with plenty of water. IF IN EYES: Hold open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook) Issue warning-pollution Restrict access Should be removed	2. LABEL 2.1 Category: None 2.2 Class: Not pertinent
3. CHEMICAL DESIGNATIONS 3.1 CG Compatibility Class: Halogenated hydrocarbon 3.2 Formula: $\text{CCl}_4$ 3.3 IMO/UN Designation: 6.1/1646 3.4 DOT ID No.: 1846 3.5 CAS Registry No.: 56-23-5	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweetish, aromatic; moderately strong etheral; somewhat resembling that of chloroform.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor canister with full face mask; protective clothing; rubber gloves. 5.2 Symptoms Following Exposure: Dizziness, incoordination, anesthesia; may be accompanied by nausea and liver damage. Kidney damage also occurs, often producing decrease or stopping of urinary output. 5.3 Treatment of Exposure: EYES AND SKIN: Flush with plenty of water; for eyes, get medical attention. Remove contaminated clothing and wash before reuse. INHALATION: immediately remove to fresh air, keep patient warm and quiet and get medical attention promptly. Start artificial respiration if breathing stops. INGESTION: induce vomiting and get medical attention promptly. No specific antidote known. 5.4 Threshold Limit Value: 5 ppm 5.5 Short Term Inhalation Limit: 25 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2; LD <sub>50</sub> = 0.5 to 5 g/kg (rat). 5.7 Late Toxicity: Causes severe liver damage and death if ingested. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Greater than 10 ppm 5.11IDLH Value: 300 ppm	6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Product: Forms poisonous phosgene gas when exposed to open flames 6.6 Behavior in Fire: Decomposes to form chlorine and phosgene 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable 6.10 Adiabatic Flame Temperature: Data not available 6.11 Stoichiometric Air to Fuel Ratio: Data not available 6.12 Flame Temperature: Data not available

7. Medtox Hotline

1. Twenty-four hour answering service - (501) 370-8263

What to Report:

- State: "This is an emergency."
- Your name, region, and site
- Telephone number to reach you
- Name of person injured or exposed
- Nature of emergency
- Action taken

2. One of three toxicologists (Drs. Raymond Harbison, Richard Freeman, or Robert James) will contact you. Repeat the information given to the answering service.

3. If a toxicologist does not return your call within 15 minutes, call the following persons in order until contact is made:

E & E Corporate Headquarters (EST 0830-1700) - (716) 632-4491

a. Twenty-four hour line - (716) 631-9530

b. Corporate Safety Director - Paul Jonmaire (Office) (716) 632-4491

c. Assistant Corporate Safety Officer - Steve Sherman (home) (716) 688-0084

Paul Moss (312)541-6635

## PROCEDURES TO FOLLOW WHEN INVOLVED IN A VEHICULAR ACCIDENT ON COMPANY TIME

1. Determine if there are any injuries. If so, call for police and medical assistance immediately.
2. Then call the office as soon as possible and ask to speak to the following people in order they appear here: Mary Ann Spidalette, Kathy Getty, Rene Van Someren, Jerry Oskvarek, Tim McDermott, Mary Jane Ripp or Mike Miller. If there are injuries to any E & E personnel or if there are serious injuries to the other party, try to reach any of these people at home. Try to have as much information as possible about any injuries sustained.
3. If there are no injuries, call the police and then call the office as soon as possible.

You will be asked to provide the following information when you call in to the office. Obtain as much information as possible before calling.

1. Name(s) of the owner(s) of the other vehicle(s) involved and any occupants.
2. Insurance carrier(s) of the other party(ies).
3. License plate and vehicle registration numbers of the other vehicle(s) involved. In addition, note the make, model and year of the car(s).
4. Name(s) of our driver and any occupants.
5. License plate and serial numbers of our vehicle as well as the make, model and year. If our vehicle is a rental car, also state the rental agency and location.
6. Location and time of the accident.
7. Description of the accident itself. Include circumstances such as the weather and physical surroundings. Upon return to the office, you will be asked to provide a sketch of the accident so you should rough draft the sketch at the scene.
8. Obtain at least one copy of the police report. This will be submitted to Buffalo with a memo and the sketch.
9. Description of damage done to our vehicle and any other involved vehicles. If you have a camera, take pictures of the damage done and any other informative or contributing conditions.
10. If the vehicle is ours and not a rental, you will need to obtain 3 estimates for repair. Depending on the degree of damage, this may be done in the field or back in Chicago.

When completing the police report, you may need the following information if you were driving one of our vehicles:

1. Our vehicles are owned by the U.S. Government; Environmental Protection Agency; c/o Ecology and Environment, Inc., Hans Neumaier, Director of Administrative Services.
2. Our insurance is with Fireman's Fund, c/o E & E, Hans Neumaier, Director of Administrative Services.
3. Buffalo's address is:

195 Holtz  
Buffalo, NY 14225

## SITE DOSIMETER LOG

TOD# FC5-8705-017SITE NAME Municipal Landfill Arlington, Va.SITE SAFETY OFFICER John LAZINSKIWEEK OF 10-3-87

NAME AND DOSIM. #	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY
Karen McTigue				S-0			
Regina BAYER				S-3			
John LAZINSKI				S-3			
George BREEN				S-3			

To the nearest half-hour, record time spent downrange as "S" (e.g., S: 2.5 hrs), time spent in active PDS operation as "P", and any time spent downrange in rescue activity as "R".

ECOLOGY AND ENVIRONMENT, INC.  
FIELD INVESTIGATION TEAM  
ON-SITE SAFETY MEETING

Project Municipal Landfill Arlington Heights

Date 10-1-87 Time 11:06 AM Job No. FIL0533GA

Address Rt. 68 & Kenicott St. / Arlington Heights, Ill.

Specific Location Kennicott Road (Just North of Dundee Rd) Arlington Heights, IL,  
2 blocks E of (53).

Type of Work Soil Sampling & Interview with site reps.

SAFETY TOPICS PRESENTED

Protective Clothing/Equipment tyvecs, booties, surgical gloves, vitons,  
Rad-badges

Chemical Hazards 1,2,-cis-dichloroethylene (Found in old MW),  
heavy metals (zinc, lead), other organics (Found in lead sample)

Physical Hazards trucks, uneven terrain, nails & general debris.

Emergency Procedures Go to hospital in Arlington Hts, contact RSC

Hospital/Clinic Northwest Comm. Hospital Phone (312) 259-1002

Special Equipment None

ECOLOGY & ENVIRONMENT, INC.  
REGION 5  
FIELD EQUIPMENT CHECKLIST

TEAM LEADER: GERARD BRENN  
PAN: FIL0533GA  
DATE OF DEPARTURE: 10-1-87  
EXPECTED DATE OF RETURN: 10-1-87

A) Safety Instruments

- Photovac TIP ID#
- HNU, 10.2 OR 11 LAMP ID#
- OVA (organic vapor analyzer) ID#
- Explosimeter/O2 meter ID#
- Drager pump, specify tube type (HON, Natural Gas, or other) ID#
- Rad-Mini ID#
- Radiation, other: ID#
- Monitox (HON) ID#
- Heat stress monitor ID#
- Noise equipment ID#
- Dust monitor-MDA system ID#

B) First Aid Equipment (specify quantity)

- First aid kit
- Oxygen inhalator
- Safety Glasses
- Life vests
- Ice vests
- Eye wash bottle

C) Respiratory Equipment (specify quantity)

- Rascal P.A.P.R. ID#
- Robert Shaw escape mask ID#
- MSA SCBA ID#
- Extra air cylinders ID#

D) Respiratory Cartridges (specify quantity)

- 3 pairs
- GMC-H
  - GM-P
  - HEPA (for rascal)
  - Other:

E) Protective Clothing

1. Suits (specify quantity)

- Splash aprons
- Saranex, Size: M, L, XL
- Tyvek, Size: M, L, XL, XXL
- Butyl acid suits
- Fully encapsulated suits
- Other:

2. Gloves (specify quantity)

- W/pvc
- Latex disposable, Size: M, L
  - Butyl Rubber, Size: M, L
  - Nitrile, Size: M, L
  - Neoprene, Size: M, L
  - Viton, Size: M, L
  - Glove liners, Size: M, L

3. Boots (specify quantity)

- 9 pairs
- Neoprene, Size:
  - Latex disposable, Size: L, XL
  - Other: Size:

A) Vehicles

- Suburban ID#
- Cargo Van ID#
- Step Van ID#

B) Sample Bottles (specify quantity)

- 80 oz. amber glass
- 1 lt. amber glass
- 40 ml. vial
- 1 lt. plastic
- 8 oz. glass
- 120 ml. glass
- Dioxin Sample Kit

C) Preservatives (specify quantity)

- HNO3
- NaOH
- Other:

D) Decon Supplies (specify quantity)

- 2 packs
- Wash tubs
  - Buckets
  - Scrub brushes
  - Solvent
  - Detergent (Alconox)
  - MSA Sanitizing solution

E) Field Equipment (specify quantity)

- Conductivity meter ID#
- PH meter ID#
- Thermometer ID#
- Masterflex pump and filter apparatus ID#
- Camera ID#
- Compass ID#
- Water-level indicator ID#
- Split-spoon samplers ID#
- Bailers ID#
- Magnetometer ID#
- Resistivity meter ID#
- Robair pump system ID#
- PVC hand pump ID#
- Well point sampler ID#
- Air sampling pump kits ID#
- Buck calibrator ID#
- Meteorological station ID#
- Metal detector ID#
- Level/tripod and rod ID#
- Pitcher pump ID#
- Photovac ID#
- Thermal desorber ID#
- Other: ID#

2 coolers

- Soil Sampling Equipment  
6 trolleys & mixing bowls

WASTE TYPE(S): Liquid ✓ Solid ✓ Sludge \_\_\_\_\_ Gas \_\_\_\_\_

CHARACTERISTIC(S): Corrosive \_\_\_\_\_ Ignitable ✓ Radioactive \_\_\_\_\_ Volatile ✓

Toxic ✓ Reactive ✓ Unknown ✓ Other (Name) Experimental carcinogen

**FACILITY DESCRIPTION:** 58 acre landfill, 1840' by 1300'. Located in commercial area, residential area within 1/2 mile.

**Principal Disposal Method (type and location):** landfill with area fill

**Unusual Features (dike integrity, power lines, terrain, etc.):** village well and water tank on property. Well only for back-up purposes. On-site lake on west boundary, not completely full. Status: (active, inactive, unknown) 1969 - present. Site is in the process of closure, applying final cover. The park district would like to utilize the area once final cover is applied.

**History: (worker or non-worker injury; complaints from public; previous agency action):** Complaint from public: A.T. Berk, 10 Terra Mire Home Owners Assoc. about apparent leachate seep on north slope of landfill. Inspections by IEPA numerous times to insure proper closure investigate complaint. On December 16, 1975 the IEPA investigated and found about 100 55-gallon barrels (most of which appeared empty) in the Southwest area of the site near the large water storage tank. Blackened earth and discolored water were observed near the barrels. Barrels held water-soluble cutting oils, wood concrete, asphalt.

Appliances, metals found open dumped. A leachate sample was analyzed in July, 84, and had high lead and many organics. The same lab, Aquatlab Inc., also tested a monitoring well and lake samples. **C. HAZARD EVALUATION** taken in Feb. 1978 for inorganics,

(Use Hazard Evaluation of Chemicals sheets for specific or representative chemicals present.):

General municipal refuse

industrial wastes

TBA		Team leader
TBA		Site Safety Officer
TBA		Sampler

WORK LIMITATIONS (Time of day, etc.): Daylight hours only, observe buddy system, monitor personnel for heat/cold stress.

COMMENTS: An observed release to groundwater scores 30.29, possible drill site candidate for the installation of monitoring wells.

# 1,2-DICHLOROETHYLENE

DEL

Common Synonyms Acetylene dichloride sym-dichloroethylene DiForm cis-1, 2-dichloroethylene trans-1, 2-dichloroethylene	Liquid  Colorless  Sweet pleasant odor  Sinks in water. Flammable, irritating vapor is produced.
<p>Wear goggles and self-contained breathing apparatus. Shut off ignition sources. Call fire department. Stop discharge if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.</p>	
Fire	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Container may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID.  VAPOR If inhaled will cause dizziness, nausea, vomiting, or difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Harmful if swallowed. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.  Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook) Issue warning-high flammability Restrict access Evacuate area Should be removed Chemical and physical treatment	2. LABEL 2.1 Category: Flammable liquid 2.2 Class: 3
3. CHEMICAL DESIGNATIONS 3.1 CG Compatibility Class: Not listed 3.2 Formula: C <sub>2</sub> HCl = CHCl 3.3 IMO/UN Designation: 3.2/1150 3.4 DOT ID No.: 1150 3.5 CAS Registry No.: 540-59-0	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ethereal, slightly acrid; pleasant, chloroform-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves; safety goggles; air supply mask or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation causes nausea, vomiting, weakness, tremor, epigastric cramps, central nervous depression. Contact with liquid causes irritation of eyes and (on prolonged contact) skin. Ingestion causes slight depression to deep narcosis. 5.3 Treatment of Exposure: INHALATION: remove from further exposure; if breathing is difficult, give oxygen; if victim is not breathing, give artificial respiration, preferably mouth-to-mouth; give oxygen when breathing is resumed; call a physician. EYES: flush with water for at least 15 min. SKIN: wash well with soap and water. INGESTION: give gastric lavage and cathartics. 5.4 Threshold Limit Value: 200 ppm 5.5 Short Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2; oral LD <sub>50</sub> = 770 mg/kg (rat) 5.7 Late Toxicity: Produces liver and kidney injury in experimental animals 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available 5.11IDLH Value: 4,000 ppm	6. FIRE HAZARDS 6.1 Flash Point: 37°F C.C. 6.2 Flammability Limits in Air: 9.7%-12.8% 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Phosgene and hydrogen chloride fumes may form in fire. 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 860°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 2.6 mm/min. 6.10 Adiabatic Flame Temperature: Data not available

7. CHEMICAL REACTIVITY 7.1 Reactivity With Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Will not occur under ordinary conditions of shipment. The reaction is not vigorous. 7.6 Inhibitor of Polymerization: None used 7.7 Molar Ratio (Reactant to Product): Data not available 7.8 Reactivity Group: Data not available	10. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook) A-X-Y

# CARBON TETRACHLORIDE

CBT

Common Synonyms Carbon Tet Tetrachloromethane Benziniform Neotetra Perchloromethane		Watery liquid  Sinks in water. Poisonous vapor is produced.	Colorless  Sweet odor
Avoid contact with liquid and vapor. Keep people away. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies			
<b>Fire</b>  Not flammable. POISONOUS AND IRRITATING GASES ARE PRODUCED WHEN HEATED. Wear goggles and self-contained breathing apparatus.			
<b>Exposure</b>  CALL FOR MEDICAL AID.  <b>VAPOR</b> POISONOUS IF INHALED. Inhaling: If in eyes, flush with plenty of water. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>Liquid</b> POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm			
<b>Water Pollution</b>  Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.  Notify local health and pollution control officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook) Issue warning poison Restrict access Should be removed		2. LABEL 2.1 Category: None 2.2 Class: Not pertinent	
3. CHEMICAL DESIGNATIONS 3.1 CG Compatibility Class: Halogenated hydrocarbon 3.2 Formula: CCl <sub>4</sub> 3.3 IMO/UN Designation: 6.1/1846 3.4 DOT ID No.: 1846 3.5 CAS Registry No.: 56-23-5		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweetish, aromatic; moderately strong ethereal; somewhat resembling that of chloroform	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor canister with full face mask; protective clothing; rubber gloves. 5.2 Symptoms Following Exposure: Dizziness, incoordination, anesthesia; may be accompanied by nausea and liver damage. Kidney damage also occurs, often producing decrease or stopping of urinary output. 5.3 Treatment of Exposure: EYES AND SKIN: flush with plenty of water; for eyes, get medical attention. Remove contaminated clothing and wash before reuse. INHALATION: immediately remove to fresh air, keep patient warm and quiet and get medical attention promptly. Start artificial respiration if breathing stops. INGESTION: induce vomiting and get medical attention promptly. No specific antidote known. 5.4 Threshold Limit Value: 5 ppm. 5.5 Short Term Inhalation Limits: 25 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2; LD <sub>50</sub> = 0.5 to 5 g/kg (rat) 5.7 Late Toxicity: Causes severe liver damage and death if ingested. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Greater than 10 ppm. 5.11IDLH Value: 300 ppm			

6. ## INDEX FORM FOR FIT FILES

This information does not have to be written out for each item to be filed. Instead, fill in Lines 1-3 and photocopy onto yellow paper to make the form obvious in the file. Then under line 4, check the respective box on the yellow sheets. Place the form directly in front of the material it represents.

1. TECHNICAL DIRECTIVE DOCUMENT (TDD) NUMBER: F05-8705-017
  2. PROJECT ACCOUNT (PAN) NUMBER: FILO533GT
  3. SITE NAME AND LOCATION: Abitibi-Temiscamingue, Municipal Landfill
  4. FILE DESCRIPTION (Check ONE Only):

RESERVED

- TECHNICAL DIRECTIVE DOCUMENT(TDD)
  - ACKNOWLEDGEMENT OF COMPLETION(AOC)
  - PERFORMANCE EVALUATION REPORT
  - SITE SAFETY PLAN AND RELATED DOCUMENTS
  - SITE INSPECTION REPORT (EPA 2070-13)
  - HRS RANKING SYSTEM REPORT (HRS)

## ECOLOGY AND ENVIRONMENT, INC.

FIELD INVESTIGATION TEAM  
GEOTECHNICAL REVIEW & PLANSITE: Municipal Landfill <sup>Arlington</sup>  
<sup>Heights, IL</sup>

LOCATION: Rt. 6 &amp; Kenicott St.

Arlington Heights, ILCook County

SITE REVIEWED BY: Paul SKlar

APPROVED BY:

SITE DESCRIPTION: 58 acre landfill. Residential area within 1/2 mile.

Long Grove (2 mi NW) residents use ground water exclusively.

Other communities use water from L. Michigan, but have emergency wells.

BACKGROUND REVIEW: Complete:  Preliminary: \_\_\_\_\_

MRS PRELIMINARY SCORE OF ROUTES: SW 17.27 SH 7.83 AIR Ø

DIRECT CONTACT  FIRE AND EXPLOSION 

TOTAL PRELIMINARY MRS SCORE VALUE (NO FIELD WORK) 10.96

PROJECTED MRS SCORE: SW 51.81 SH 8.39 AIR Ø  
(WITH FIELD WORK)DIRECT CONTACT  FIRE AND EXPLOSION 

TOTAL PROJECTED MRS SCORE 30.29

DRILLING: Number of Wells 12 Estimated Project Cost \$ 150,000

Need for Drilling: Yes  No 

If yes, provide brief scope of work:

If no, provide rationale: \_\_\_\_\_

See attached memo.

NOTE: A site with a projected MRS score of <28.5 MAY be drilled after sites with projected scores of >28.5 have been completed. Potential drilling sites with scores <28.5 will be prioritized, with the highest scored sites being drilled first.

\* A log for a well east of landfill has several sand & gravel units, ranging in thickness from 3-21 feet, interbedded w/ clay layers.
